tradēex Mobile Sea water Desalination Equipment

tradeex

- (1) Flow rate: 500LPD-50000LPD
- (2) Feed water TDS: <45000PPM
- (3) Purified water TDS: <600PPM
- (4) Operation Pressure : 2-5.5Mpa
- (5) Automatic control, one key for operation
- (6) Portable size, compact structure
- (7) Application: treat Seawater/brackish water to drinking water.

- Mobile Fresh Water Purification Equipment

- (1) Flow rate: 100L/H ~50T/H
- (2) Feed Water TDS: <3000PPM
- (3) Salt Rejection rate: 99.5%
- (4) Output water quality meets WHO drinking water standards.
- (5) Operation Pressure: 0.7-2Mpa
- (5) Automatic control, One key operation.
- (6) Portable, movable, and compact.
- (7) Application: Treat river water, well water, lake water etc to drinking water.

Solar Powered Purification Water Station Specification:

- (1) Flow rate:1500LPH
- (2) Equipment total power: About 450W
- (3) Bacterial removing rate: >99.99%
- (4) Equipment output water quality meets WHO drinking water standards.
- (5) Filtration system working time is more than 4H/D.
- (6) It can realize low power protection, overcharge protection and other functions.
- (7) Solar panel charging power: 600W
- (8) It can be connected to the municipal electricity operation, the emergency situation can be provided by the gasoline generator power;
- (9) Automatic control, which can realize the functions of backwash, air cleaning and chemical cleaning;
- (10) Application of water sources: such as surface water, groundwater, rainwater, tap water, etc.
